## FULL STACK DEVELOPER

---

Passionate Full-Stack Developer with hands-on experience building and deploying real-world applications. Skilled in creating user-focused solutions using modern web technologies, and contributing to both frontend and backend development.

### PROFESSIONAL EXPERIENCE

#### Full Stack Developer, Kapu Digital

July 2025 - Present, Nairobi, Kenya

- Developed responsive UIs with **React**, **Next.js**, **WordPress**, improving usability and mobile performance.
- Built and maintained scalable backend APIs using **Node.js**, **Express**, **MongoDB**, ensuring smooth data flow.
- Built a theme using **PUCK** and developed an AI description generator enabling customization and faster setup
- Worked closely with cross-functional teams to deliver features from concept to deployment.

#### Frontend Developer Intern, Kapu Digital

March 2025 - June 2025, Nairobi, Kenya

- Translated UI/UX designs into reusable components using **React**, **Next.js**, **Ant Design**, **Chakra UI** and **BootStrap**.
- Integrated frontend with backend APIs, improving application performance
- Participated in code reviews, debugging, and feature optimizations.

### TECHNICAL SKILLS

---

- Programming Languages:** JavaScript, Python, TypeScript, HTML, CSS
- Frontend:** React.js, Next.js, Chakra UI, Tailwind CSS, Zustand
- Backend:** Flask, Node.js, Express.js
- Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- CMS & Platforms:** WordPress (Elementor, Salient), cPanel
- DevOps & Tools:** Git, GitHub, Postman, CI/CD, Agile, Render, Vercel

### PROJECTS

---

#### DukaNext - [Landing Page](#) | [Ngemi Homecoming](#) | [Blaqfiti](#)

An eCommerce platform that enables shop owners to create, customize, and manage their own online stores.

- Contributed to feature development and UI improvements using the MERN stack .
- Enhanced existing functionality and optimized user flows to improve the overall experience.
- Created Pack theme builder and AI listing generator, improving setup speed and content quality.
- Collaborated with the development team to debug issues, implement feedback, and support iterative delivery.

#### BLOGNEST - [Github](#) | [View Project](#)

- Created a full-stack blog platform with secure user authentication (JWT), blog filtering, and publishing features.
- Built RESTful API (Node.js, Express.js) with MongoDB and responsive frontend (React + Chakra UI).
- Used Zustand for global state management and enhanced performance.

### OPEN SOURCE CONTRIBUTION

---

CREATIVE COMMONS SEARCH PORTAL(SEARCH)

Remote

Fixed UI spacing issue ([#235](#)); PR merged: <https://github.com/creativecommons/search/pull/243>

### EDUCATION

---

#### Moringa School - Certificate in Software Engineering

Nairobi, Kenya

Intensive full-stack web development bootcamp

December 2023 – August 2024

#### Moringa School - Certificate in DevOps Engineering

Nairobi, Kenya

Comprehensive training in DevOps principles

June 2023 – August 2023
